## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 9-17 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Independent claim 9 is directed to a slurry for a lithium-ion battery comprising a binder comprising a polymer containing 1,3-butadiene derived units and 0-15 wt% of structural units derived from an ethylenically aliphatic hydrocarbon monomer. WO 99/12221 (US 6,200,707) is the closest prior art to this subject matter. The reference discloses a block copolymer having 1,3-butadiene derived units, and other structural units. However, the reference discloses that at least 90% of the butadiene-derived units are hydrogenated to produce a butene or polyethylene-like structure (see col. 4, line 64 and col. 6, line 46). These units correspond to the "structural units derived from an ethylenically aliphatic hydrocarbon monomer" recited in instant claim 9.

However, these units are present in an amount substantially larger than the claimed upper limit of 15 wt%, even in the situation where the amount of butadiene-derived units in the polymer is kept at the minimum level. As such, claim 9 is patentably distinguished over the WO '221 reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Conclusion*
